BOTECH
A step beyond cybersecurity

Protect yourself against **cyberthreats** for less than the cost of a coffee a day

What is vSOC ThreatGuard+?

vSOC ThreatGuard+ is a **virtual security operations center** that provides **advanced protection against cyber threats** through a combination of cutting-edge technology and data analytics to protect your digital infrastructure.

Why a security platform?

Some **160** million **malware** samples are created every year, and there are **578 ransomware** attack attempts worldwide for every minute that passes. **Protecting against these threats** is not an option, it is a must.

What need does it cover?

With vSOC ThreatGuard+ you will have **continuous and effective protection** against cyber-attacks such as ransomware, information theft and service interruptions, among others, strengthening the security and operability of your organization.

SPAIN - MEXICO - USA - BRAZIL - CHILE - DOMINICAN REPUBLIC - PERU - COLOMBIA

Benefits

Safety and security

- **Protection against ransomware:** Prevents data hijacking, avoiding ransom payments and data loss.

- **Security of confidential information:** Protects valuable data against theft, guaranteeing its integrity.

Operability and continuity

- **Continuous operation:** Avoids prolonged service interruptions, ensuring that the company's operations do not come to a halt.

- **Reduced recovery costs:** Minimizes the costs associated with recovery after an attack, protecting the company's financial resources.

Compliance and trust

- **Regulatory compliance:** Ensures that the company complies with cybersecurity regulations, avoiding fines and sanctions.

- **Reputation preservation:** Maintains the trust of customers and partners, ensuring business continuity.

Efficiency and improvement

- **Password strength:** Ensures that the passwords used are unbreakable, increasing security.

- **Insurance optimization:** Reduces post-incident insurance policy costs, improving economic efficiency.

Loyalty and asset protection

- **Customer loyalty:** Protects the relationship with existing customers, ensuring their satisfaction and loyalty.

- **Intellectual property security:** Protects valuable information, ensuring its integrity and confidentiality.

Additional features

- **24/7 Incident Response and Analysis:** Continuous threat monitoring and response

- **Advanced technology and automation:** Use of state-of-the-art tools for risk detection and mitigation.

- **Customization:** Adaptation to the specific needs of each company.
